**HAVE YOU PERFORMED A HAZARDOUS MATERIALS ASSESSMENT ON THE STRUCTURE?**

- [ ] Yes  
- [ ] No

The Washington State Dangerous Waste Regulations (WAC 173-303) require that demolition debris be evaluated to determine if it is dangerous. The evaluation should be completed before demolition to ensure that hazardous constituents are not released to the environment and do not present a risk to human health during or after demolition. These requirements apply to all buildings being demolished and are the responsibility of the property owner. The Washington Department of Ecology’s website, [https://ecology.wa.gov/Regulations-Permits/Guidance-technical-assistance/Dangerous-waste-guidance/Common-dangerous-waste/Construction-and-demolition](https://ecology.wa.gov/Regulations-Permits/Guidance-technical-assistance/Dangerous-waste-guidance/Common-dangerous-waste/Construction-and-demolition), provides more information about the requirements and about sampling and testing construction materials to determine if they present a risk. For more information please contact a Hazardous Waste Inspector at the Washington Department of Ecology Southwest Regional Office: 360-407-6300.
Hi Tina,

Thanks for the followup. Yes, please find the docs attached. I was slammed this morning and unable to get to this earlier.

I let the contractor (KRG) and the residents at 3810 NE 82nd know that it'll be ten days until demo can take place. There was some concern over the shop being broken into during that waiting period.

Thanks for your's and Brian's help with this process!

Hi Brian,

I received the attached results from Advantage Environmental - no asbestos present. Do I now come into your office with the money and Notice of Demo?

Thanks,

David,

I wanted to do a quick follow up to our conversation. Given the photos you provided, I saw two suspect asbestos containing materials (SACM) that need to be sampled before I can issue a report.

Option 1: you as the property owner can take a sample of the 3-tab and underlaying tar paper( http://www.swcleanair.org/asbestos/sampling.asp ) and take it to a lab (http://www.swcleanair.org/asbestos/analyticallabs.asp) for analysis. Then submit the results to me. If no asb is found, I write the report and you submit notice of demo. If asbestos is found the further discussion is warranted; or
Option 2: Hire an AHERA Contractor (http://www.swcleanair.org/asbestos/aherainspectors.asp) to perform a full survey on the structure. If no asbestos is found, submit the report with the notice of demolition. If asbestos is found, further discussion is warranted.

Thanks.

Hi Tina,

I was in the office earlier today talking to Brian about a shop demolition. Brian asked to see photos to make an asbestos determination. Attached are photos for his review. Please forward them to him. If Brian would like to see more photos, I please follow the link below.

Re: Demolition of Detached Garage Only (Residential Building(s) Excluded)

Mr. Clark:

Based on the information and photos you provided of the garage at 3810 NE 82nd St, Vancouver, WA 98665, I find no evidence of asbestos containing materials that would require further action prior to the demolition/deconstruction of this structure (residential buildings excluded).

These conclusions are based on the information you provided, the attached pictures and sample results emailed to me. SWCAA is not responsible for any asbestos-containing material that might be behind walls, under floors, underground or in any area not depicted in the referenced photographs. If suspect asbestos containing material is discovered during demolition, the project must stop and an AHERA certified asbestos contractor should be consulted. An AHERA inspection must also be performed prior to the demolition of any residential structure or other building not depicted in the attached photos.

A Notification of Demolition must be submitted at least 10 working days prior to commencement of demolition activity. A copy of this letter must be included with the Notification of Demolition.

If you have any questions regarding this matter, please call me at 360-574-3058 x138.

Sincerely,

Brian Fallon
Air Quality Specialist
