I. ABBREVIATIONS

List of Common Abbreviations
ADP  Air Discharge Permit
AOP  Air Operating Permit
CEM  Continuous Emission Monitor
CFR  Code of Federal Regulations
CO   Carbon monoxide
EPA  U.S. Environmental Protection Agency
EU   Emission unit
EU#  Refers to a specific emission unit numbered "#"
FCAA Federal Clean Air Act
G#   Refers to a specific general term or condition numbered "#"
gr/dscf Grains per dry standard cubic foot
HAP  Hazardous air pollutant
IEU  Insignificant emission unit
IEU# Refers to an insignificant emission unit numbered "#"
K#   Refers to a specific recordkeeping term or condition numbered "#"
M#   Refers to a specific monitoring term or condition numbered "#"
MMBtu Million British thermal units
MSDS Material safety data sheet
MW   Megawatts
N#   Refers to a specific nonapplicable requirement numbered "#"
NH3  Ammonia
NOx  Oxides of nitrogen
NSR  New Source Review
O2   Oxygen
P#   Refers to a specific permit provision numbered "#"
PM   Particulate matter
PM10 Particulate matter less than 10 microns in diameter
PM2.5 Particulate matter less than 2.5 microns in diameter
ppmvd Parts per million by volume, dry
PTE  Potential to emit
R#   Refers to a specific reporting term or condition numbered "#"
RACT Reasonably available control technology
RCW Revised Code of Washington
Req-# Refers to a specific applicable requirement numbered "#"
SO2  Sulfur dioxide
SIP  State implementation plan
SWCAA Southwest Clean Air Agency
TAP  Toxic air pollutant
tpy  Tons per year
VOC  Volatile organic compound
WAC  Washington Administrative Code

Terms not otherwise defined in this permit have the meaning assigned to them in the referenced regulations.
II. REGULATORY BASIS

This Air Operating Permit (AOP) is authorized under the procedures established in WAC 173-401 and Title V of the 1990 Federal Clean Air Act Amendments. The terms and conditions of this permit describe the emissions limitations, operating requirements, ambient monitoring, recordkeeping requirements, and reporting frequencies for the permitted source.

Permit terms and conditions are divided into the following categories: General Terms and Conditions, Operating Terms and Conditions, Monitoring Terms and Conditions, Recordkeeping Terms and Conditions, and Reporting Terms and Conditions. As used in this permit, there is no distinction between "terms" and "conditions." As such, "condition" shall mean the same as "terms and conditions" as referred to in Title V of the 1990 Federal Clean Air Act Amendments. The conditions required under this permit are determined necessary to assure and provide for certification of compliance with applicable local, state, and federal air pollution regulations and standards.

A comprehensive list of the local, state, and federal air pollution requirements applicable to emissions units and other air pollution sources located at the permittee's facility is provided in Sections V through X. These requirements were determined applicable based on the equipment specifications and regulatory history of each emissions unit as described in the Basis Statement for this permit. These requirements are drawn from numerous regulations date of each requirement generally coincides with the most recent rulemaking activity.

In some cases, there are multiple effective dates that reflect differences in federal versus state/local applicability. This situation is most notable with requirements that are in the Washington SIP. To clarify which version of a requirement is applicable to the facility, the effective dates of applicable requirements are presented in the table below.

SWCAA has not been delegated authority by EPA for selected subparts of 40 CFR 60, 40 CFR 61, or 40 CFR 63. All monitoring, reporting, or recordkeeping for those subparts that is required to be sent to the EPA Administrator shall be sent to both SWCAA and the EPA Administrator. Unless otherwise specified in the delegation agreement, once authority for specific subparts of 40 CFR 60, 40 CFR 61, or 40 CFR 63 have been delegated to SWCAA by EPA, all monitoring, reporting, or recordkeeping that is required to be sent to the EPA Administrator shall only be sent to SWCAA.

<tr>
<td>EU1</td>
<td>Combustion</td>
<td>One General Electric model 7A1PFA28-1 natural gas fired combustion turbine (serial #296845) configured with inlet fogging. The combustion turbine is designed to produce approximately 179 MW of electrical power. The combustion turbine operates in conjunction with an unfired heat recovery steam generator (HRSG) that drives a steam turbine. The steam turbine is designed to produce approximately 69 MW of electrical power. Emissions from the combustion turbine consist of NOx, CO, SO2, PM, VOC, NH3, HAPs, and TAPs. Emissions of nitrogen oxides (NOx) and carbon monoxide (CO) from the combustion turbine are controlled by a selective catalytic reduction (SCR) system and an oxidation catalyst, respectively.</td>
</tr>
<tr>
<td>EU2</td>
<td>Startup Boiler</td>
<td>One Nebraska Boiler model NS-E-76SH (serial number D-3570) natural gas fired boiler rated at 70,000 pounds of steam per hour. The startup boiler has a nominal heat input rating of 103.5 million British thermal units per hour (MMBtu/hr). Emissions from the startup boiler consist of NOx, CO, SO2, PM, VOC, and TAPs.</td>

**IV. PERMIT PROVISIONS**

40 CFR 51.212
40 CFR 52.12, 40 CFR 52.33
40 CFR 60.11

**P1. Credible Evidence**

For the purposes of submitting compliance certifications or establishing whether a violation of any term or condition of this permit has occurred or is occurring, nothing shall preclude the use, including the exclusive use, of any credible evidence or information, relevant to whether the permittee would have been in compliance with a specific term or condition if the appropriate performance or compliance test or procedure would have been performed.

**P2. Insignificant Emission Unit - Restriction**

WAC 173-401-530(6)

Any emissions unit or activity that qualifies as insignificant solely on the basis of provisions in WAC 173-401-530(1)(a) shall not exceed the emissions thresholds specified in WAC 173-401-530(4) until this permit is modified pursuant to WAC 173-401-725.

**P3. Permit Duration**

WAC 173-401-610

This permit shall be valid for a fixed term of 5 years.

**P4. Confidentiality of Records and Information**

WAC 173-401-500(5)
WAC 173-401-620(2)(e)
SWCAA 400-270

The permittee is responsible for clearly identifying information that is considered proprietary and confidential prior to submittal to SWCAA. Requests for proprietary and confidential information shall be released only after legal opinion by SWCAA’s legal counsel, and notice to the permittee of the intent to release or deny the release of information.

In the case where the permittee has submitted information to SWCAA under a claim of confidentiality,
SWCAA may also require the source to submit a copy of such information directly to the EPA Administrator.

Upon request, the permittee shall also furnish to the permitting authority copies of records required to be kept by the permittee or, for information claimed to be confidential, the permittee may furnish such records directly to the EPA Administrator along with a claim of confidentiality. Permitting authorities shall maintain confidentiality of such information in accordance with RCW 70.94.205.

<table>
<thead>
<tr>
<th>P5. Standard Conditions</th>
<th>WAC 173-401-620(2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Duty to comply. The permittee must comply with all conditions of this Chapter 401 permit. Any permit noncompliance constitutes a violation of Revised Code of Washington (RCW) Chapter 70.94 and, for federally enforceable provisions, a violation of the FCAA. Such violations are grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.</td>
<td></td>
</tr>
<tr>
<td>(b) Need to halt or reduce activity not a defense. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.</td>
<td></td>
</tr>
<tr>
<td>(c) Permit actions. This permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.</td>
<td></td>
</tr>
<tr>
<td>(d) Property rights. This permit does not convey any property rights of any sort, or any exclusive privilege.</td>
<td></td>
</tr>
<tr>
<td>(e) Duty to provide information. The permittee shall furnish to the permitting authority, within a reasonable time, any information that the permitting authority may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon request, the permittee shall also furnish to the permitting authority copies of records required to be kept by the permittee or, for information claimed to be confidential, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality. Permitting authorities shall maintain confidentiality of such information in accordance with RCW 70.94.205.</td>
<td></td>
</tr>
<tr>
<td>(f) Permit fees. The permittee shall pay fees in accordance with RCW 70.94.162 as a condition of this permit in accordance with the permitting authority's fee schedule. Failure to pay fees in a timely fashion shall subject the permittee to civil and criminal penalties as prescribed in RCW 70.94.430 and 70.94.431.</td>
<td></td>
</tr>
<tr>
<td>(g) Emission trading. No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are provided for in this permit.</td>
<td></td>
</tr>
<tr>
<td>(h) Severability. If any provision of this permit is held to be invalid, all unaffected provisions of the permit shall remain in effect and be enforceable.</td>
<td></td>
</tr>
<tr>
<td>(i) Permit appeals. This permit or any conditions in it may be appealed only by filing an appeal with the Pollution Control Hearings Board and serving it on the permitting authority within thirty days of receipt of the permit pursuant to RCW 43.21B.310. This provision for appeal in this section is separate from and additional to any federal rights to petition and review under § 505(b) of the FCAA.</td>
<td></td>
</tr>
</tbody>
</table>
(j) **Permit continuation.** This permit and all terms and conditions contained herein shall not expire until the renewal permit has been issued or denied if a timely and complete application has been submitted. An application shield granted pursuant to WAC 173-401-705(2) shall remain in effect until the renewal permit has been issued or denied if a timely and complete application has been submitted.

**P6. Federally Enforceable Requirements**

WAC 173-401-625

(a) All terms and conditions in an air operating permit, including any provisions designed to limit a source's potential to emit, are enforceable by the Administrator and citizens under the FCAA, except as indicated in paragraph (b) below.

(b) Notwithstanding subsection (a), any terms and conditions included in this permit that are not required under the FCAA or under any of its applicable requirements are specifically designated as "state" or "local" only, and are not federally enforceable under the FCAA. Terms and conditions so designated are not subject to the requirements of WAC 173-401-810.

**P7. Permit Shield**

WAC 173-401-640

Compliance with the conditions of this permit shall be deemed compliance with all applicable requirements that are specifically identified in this permit as of the date of permit issuance. Nothing in this permit shall alter or affect the following:

(a) The provisions of Section 303 of the FCAA (emergency orders), including the authority of the Administrator under that section;

(b) The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;

(c) The applicable requirements of the acid rain program, consistent with Section 408(a) of the FCAA;

(d) The ability of EPA to obtain information from a source pursuant to Section 114 of the FCAA; and

(e) The ability of the permitting authority to establish or revise requirements for the use of reasonably available control technology (RACT) as defined in RCW 70.94.030(19).

**P8. Emergency Provision**

WAC 173-401-645

An "emergency" as defined in WAC 173-401-645(1) shall constitute an affirmative defense to an action brought for noncompliance with technology based emission limitations. The burden of proof lies with the permittee. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(a) An emergency occurred and that the permittee can identify the causes(s) of the emergency;

(b) The permitted facility was at the time being properly operated;

(c) During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and

(d) The permittee submitted notice of the emergency to the permitting authority within two working days of the time when emission limitations were exceeded due to the emergency or shorter periods of time specified in an applicable requirement. This notice fulfills the requirement of WAC 173-401-615(3)(b) unless the excess emissions represent a potential threat to human health and safety. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.
P9. Permit Expiration – Application Shield  \[\text{WAC 173-401-710(3)}\]
Permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted consistent with WAC 173-401-710(1) and WAC 173-401-500. All terms and conditions of the permit shall remain in effect after the permit expires if a timely and complete permit application has been submitted. Operation under the terms and conditions of the expired permit will be allowed until SWCAA takes final action on the renewal application.

P10. Permit Revocation  \[\text{WAC 173-401-710(4)}\]
The permitting authority may revoke a permit only upon the request of the permittee or for cause. The permitting authority shall provide at least thirty days written notice to the permittee prior to revocation of the permit or denial of a permit renewal application. Such notice shall include an explanation of the basis for the proposed action and afford the permittee an opportunity to meet with the permitting authority prior to the authority's final decision. A revocation issued under this section may be issued conditionally with a future effective date and may specify that the revocation will not take effect if the permittee satisfies the specified conditions before the effective date.

P11. Reopening for Cause  \[\text{WAC 173-401-730}\]
This permit shall be reopened and revised under any of the following circumstances:
(a) Additional applicable requirements become applicable to a major air operating permit source with a remaining permit term of 3 or more years. Such a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions have been extended pursuant to WAC 173-401-620(2)(j);
(b) Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit;
(c) The permitting authority or Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit; or
(d) The Administrator or the permitting authority determines that the permit must be revised or revoked to assure compliance with the applicable requirements.

Proceedings to reopen and issue this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists. Reopenings under this section shall not be initiated before a notice of such intent is provided to the AOP source by the permitting authority. Such notice shall be made at least 30 days in advance of the date that the permit is to be reopened, except that the permitting authority may provide a shorter time period in the case of an emergency.

P12. Excess Emissions  \[\text{SWCAA 400-107}\]
The permittee shall report excess emissions to SWCAA as soon as possible. Excess emissions due to startup or shutdown conditions or due to scheduled maintenance shall be considered unavoidable provided the source reports as required under by SWCAA 400-107(1) and adequately demonstrates that the excess emissions could not have been prevented or avoided.
Excess emissions due to upsets shall be considered unavoidable provided that the permittee reports as soon as possible but no later than 48 hours after discovery, and adequately demonstrates that:
(a) The event was not caused by poor or inadequate design, operation, or maintenance, or any other reasonably preventable conditions;
(b) The event was not of a recurring pattern indicative of inadequate design, operation, or maintenance;
(c) The operator took immediate and appropriate corrective action in a manner consistent with good air pollution control practice for minimizing emissions during the event, taking into account the total emissions impact of the corrective action, including slowing or shutting down the emission unit as necessary to minimize emissions, when the operator knew or should have known that an emission standard or permit condition was being exceeded; and
(d) The owner or operator(s) actions in response to the excess emissions were documented by properly signed, contemporaneous operating logs, or other relevant evidence.

V. GENERAL TERMS AND CONDITIONS

G1. Certification of Submittals

All application forms, reports, and compliance certifications must be certified by a responsible official. Certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information contained in the submittal are true, accurate, and complete.

G2. Duty to Supplement or Correct Application

The permittee, upon becoming aware that relevant facts were omitted or incorrect information was submitted in a permit application, shall promptly submit such supplementary facts or corrected information. In addition, the permittee shall provide additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a draft permit.

G3. Inspection and Entry

The permittee shall allow inspection and entry, upon presentation of credentials and other documents as may be required by law, by the permitting authority or an authorized representative to perform the following:
(a) Enter upon the permittee's premises where an air operating permit source is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
(b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;
(c) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
(d) As authorized by SWCAA 400-105 and the FCAA, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.
G4. Schedule of Compliance  
WAC 173-401-630(3)  
The permittee shall continue to comply with all applicable requirements with which the source is currently in compliance, and meet on a timely basis any applicable requirements that become effective during the permit term.

G5. Permit Renewal  
WAC 173-401-710(1)  
The permittee shall submit a complete permit renewal application to SWCAA no later than the date established in the permit.

This permit expires on April 5, 2016. A renewal application is due on April 5, 2015. A complete renewal application is due no later than October 5, 2015.

G6. Transfer of Ownership or Operational Control  
WAC 173-401-720(1)(d)  
A change in permittee due to transfer of ownership or operational control of an affected source requires a request for administrative permit amendment as governed by WAC 173-401-720.

G7. Misrepresentation and Tampering  
SWCAA 400-105(6&7)  
The permittee shall not make any false material statement, representation or certification in any form, notice, or report. The permittee shall not render inaccurate any monitoring device or method required under Chapter 70.94 RCW, or any ordinance, resolution, regulation, permit, or order in force pursuant thereto.

WAC 173-400-117, WAC 173-400-700  
WAC 173-460 (effective 8/21/98)  
SWCAA 400-109, SWCAA 400-110  
SWCAA 400-111, SWCAA 400-141  

G8. New Source Review  
SWCAA 400-110(5) - SIP version  
SWCAA 400-110(6)  
The permittee shall not construct or modify a source that is required to be reviewed under SWCAA 400-110, 400-111, 400-141 and/or WAC 173-460 (effective 8/21/98) without first receiving an approval or permit under such provisions. Portable sources may be exempt from this requirement if they fulfill the criteria described in G9.

G9. Portable Sources  
SWCAA 400-110(5) - SIP version  
SWCAA 400-110(6)  
Portable sources which locate temporarily at the site of an air operating permit source shall be allowed to operate at the temporary location without filing an Air Discharge Permit application provided that:

(a) The source/emissions units are registered with SWCAA;
(b) The source/emissions units have an Air Discharge Permit to operate as a portable source;
(c) The owner(s) or operator(s) notifies SWCAA of the intent to operate at the new location at least ten business days prior to starting the operation;
(d) The owner(s) or operator(s) supplies sufficient information including production quantities and hours of operation, to enable SWCAA to determine that the operation will comply with the emission standards for a new source, and will not cause a violation of applicable ambient air quality standards and, if in a nonattainment area, will not interfere with scheduled attainment of ambient standards; and
(e) The owner(s) and/or resident(s) of immediately adjacent properties shall be notified by the owner(s) or operator(s) of the portable source in writing at least 10 business days prior to commencement of operations at the proposed location with copies mailed to SWCAA. Written notification to the adjacent landowners/residents shall be by certified mail with return receipt requested. Such written notification shall include a complete description of the proposed operation, the associated emissions control provisions and equipment, the total estimated project emissions, the name, address and phone number of the person in charge of the operation, and the address and phone number for SWCAA. Written notification shall indicate that all comments shall be directed to SWCAA.

G10. Replacement or Substantial Alteration of Emission Control Technology at an Existing Stationary Source

Prior to replacing or substantially altering emission control technology or equipment installed at an existing stationary source or emission unit, the permittee shall file an air discharge permit application with SWCAA. Construction shall not commence on a project subject to review until SWCAA issues a final air discharge permit or other regulatory order. However, any air discharge permit application filed under this section shall be deemed to be approved without conditions if the Agency takes no action within thirty (30) days of receipt of a complete application.

G11. Outdoor Burning

The permittee is prohibited from conducting outdoor burning except as allowed by SWCAA 425.

G12. Asbestos

The permittee shall comply with the provisions of SWCAA 476 “Standards for Asbestos Control, Demolition and Renovation” when conducting any renovation, demolition or asbestos storage activities at the facility.

G13. Protection of Stratospheric Ozone

The permittee shall comply with the standards for recycling and emissions reduction as provided in 40 CFR 82, Subparts B and F.

40 CFR 68 requires risk management plans be developed for the substances and thresholds listed in Section 68.130. The permittee shall comply with the requirements of the Chemical Accident Prevention Provisions of 40 CFR 68 no later than the following dates:

(a) Three years after the date on which a regulated substance, present above the threshold quantity, is first listed under 40 CFR 68.130; or

(b) The date on which a regulated substance is first present above a threshold quantity in a process.
G15. Reporting of Emission of Greenhouse Gases

WAC 173-441 requires owners and operators of affected facilities to quantify and report emissions of greenhouse gases from applicable source categories listed in WAC 173-441-120. This regulation applies to any facility located in Washington state with total greenhouse gas emissions of ten thousand metric tons CO₂e or more per calendar year. The permittee shall prepare and submit greenhouse gas reports to Ecology in accordance with the provisions of WAC 173-441-050 for each affected facility.

VI. OPERATING TERMS AND CONDITIONS

The following table lists all federal, state, and/or locally enforceable requirements applicable to the permittee. The applicable legal authority is listed below each requirement. Applicable requirements identified as having "plantwide" applicability apply to both EUs and IEUs. Some of the requirements have been partially adopted into the Washington State Implementation Plan (SIP). Only those parts adopted into the Washington SIP are federally enforceable. Requirements which are not required under the FCAA are denoted as state or local only. Monitoring requirements are used to provide a reasonable assurance of compliance with the applicable requirements, and may or may not involve the use of a reference test method.

| Req-52 | Effective May 3, 2013, the permittee shall minimize the time each emergency engine spends at idle and minimize each engine's startup time at startup to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes.  
  [40 CFR 63.6625(h) & Table 2c] | EU4 EU5 | M13 |
| Req-53 | Effective May 3, 2013, operation of emergency engines for purposes other than emergency operation, maintenance and testing, or limited non-emergency operation as described below is prohibited.  
  There is no limit on engine operation in emergency situations. Maintenance checks and readiness testing are allowed if recommended by Federal, State or local government, the manufacturer, the vendor, or the insurance company associated with the engine, and are limited to no more than 100 hr/yr. Emergency engines may be operated for up to 50 hr/yr in nonemergency situations, but such operation cannot be used for peak shaving or to generate income for supplying power to an electric grid. Nonemergency operation is counted against the 100 hr/yr allowance for maintenance and readiness testing.  
  [40 CFR 63.6640(f)(1)] | EU4 EU5 | M13 |
VII. MONITORING TERMS AND CONDITIONS
To assure compliance with all applicable requirements, the permittee shall perform the monitoring program specified below. Specified monitoring is not required whenever an emission unit is not operated during a time period equal to or greater than the designated monitoring period. For these periods, the permittee shall record and report the reason why and the length of time the emission unit was not operated. Pursuant to WAC 173-401-530(2)(c), the following monitoring requirements do not apply to IEUs.

The permittee shall make a record of all required monitoring activities as described in Sections K1 and K2 of this permit.

M1. Visible Emissions Monitoring
This monitoring requirement applies to Req-1, 20, 30, 41, 47

On a monthly basis, the permittee shall perform a brief qualitative observation of affected emission units during daylight hours for the purpose of identifying potential visible emissions violations. Based upon the qualitative observation, the permittee shall take one or more of the following actions:

(a) If no visible emissions are observed, the permittee shall make a record of the observation, and no further action is necessary.

(b) If visible emissions are observed, the permittee shall identify the source of the emissions, and confirm whether the pertinent equipment is or is not experiencing a malfunction and that all relevant air pollution control equipment is operating properly. Within 24 hours of initial discovery, the permittee shall take corrective action to resolve the problem, and shall notify SWCAA regarding its progress in resolving the problem.

(c) Subsequent to taking corrective action, the permittee shall perform a second qualitative observation of affected emission units. If no visible emissions are observed, then no further action is necessary. If visible emissions are still observed, the permittee shall demonstrate compliance with applicable visible emission limits by conducting a visible emissions evaluation in accordance with SWCAA Method 9 within 72 hours of initial discovery. For visible emissions in compliance with applicable visible emission limits, no further action is necessary.

If observed visible emissions are demonstrated to be out of compliance with applicable visible emissions limits, the permittee shall report an excess emission as described in Section R1 and make a record of the event. Additional adjustments, repairs, and/or maintenance shall be performed as soon as practical to reduce the visible emissions to a level at or below the applicable opacity limit.

Implementation of corrective action does not shield the permittee from enforcement action by SWCAA or from the obligation of reporting permit deviations as specified in WAC 173-401-615(3).
M2. Fugitive Emissions/Fallout Monitoring  
WAC 173-401-615(1)(b)
This monitoring requirement applies to Req-2, 3, 8, 11, 20

On a monthly basis, or in response to a complaint, the permittee shall perform an inspection of affected emission units during daylight hours for the purpose of identifying fugitive emissions or particulate matter fallout. Based upon results of the inspection, the permittee shall take one or more of the following actions:

(a) If no particulate matter fallout or fugitive emissions are observed, the permittee shall make a record of the observation, and no further action is necessary.

(b) If particulate matter fallout or fugitive emissions are observed during an inspection, the permittee shall identify the source of the emissions and confirm whether the affected equipment and/or associated air pollution control equipment is operating properly. The permittee shall resolve identified problems within 24 hours of initial discovery, or notify SWCAA by the next business day of the progress made in resolving the problem. Reasonable precautions and good work practices shall be employed to minimize emissions for the duration of the event. Implementation of corrective action does not relieve the permittee from the obligation of reporting permit deviations as specified in WAC 173-401-615(3).

M3. Particulate Matter Monitoring  
WAC 173-401-615(1)(b)
This monitoring requirement applies to Req-9, 10

On a monthly basis, the permittee shall perform a qualitative observation of affected emission units during daylight hours while the units are in operation for the purpose of identifying potential violations of applicable particulate matter emission limits. Based upon the qualitative observation the permittee shall take one or more of the following actions:

(a) If no visible emissions are observed, affected emission units are assumed to be in compliance with applicable emission limits. The permittee shall make a record of the observation and no further action is necessary.

(b) If visible emissions are observed, the permittee shall verify that the emission unit or process emitting the visible emissions and any associated air pollution control equipment are operating properly. If the equipment is not operating properly, the permittee shall resolve the problem no later than 24 hours after initial discovery, or notify SWCAA by the next business day of the progress made in resolving the problem. Subsequent to resolving the problem, a second qualitative observation shall be made. If visible emissions are still observed, the permittee shall continue to make adjustments and/or repairs until such time as the affected emission unit is demonstrated to be in compliance. Implementation of corrective actions does not shield the permittee from enforcement action by SWCAA or from the obligation of reporting permit deviations as specified in WAC 173-401-615(3).
M4. Complaint Monitoring  
WAC 173-401-615(1)(b)

This monitoring requirement applies to Req-2, 3, 4, 5, 8, 11

The permittee shall record, and maintain record of, any air quality related complaints received by either the permittee or SWCAA. All complaints shall be investigated no later than one work day after the permittee has been notified. The permittee shall determine the validity of each complaint and the cause of any emissions that may have prompted the complaint, and initiate appropriate corrective action in response to the complaint. Within 24 hours of notification and investigation, permittee shall resolve the subject of the complaint, or notify SWCAA by the next working day of progress made in resolving the complaint.

M5. Combustion Turbine Operations Monitoring  
ADP 95-1800R5, Conditions 22 & 25

This monitoring requirement applies to Req-23, 24, 25, 26, 27, 28

The permittee shall monitor and record the operational parameters/events listed below.

(a) Hourly heat input (MMBtu/hr) for every hour or part of any hour during which fuel is combusted following procedure 5 in Appendix F of 40 CFR Part 75;
(b) Hourly fuel consumption (MMscf/hr);
(c) Hourly turbine output (MW);
(d) Startup and shutdown periods;
(e) Combustion turbine maintenance and repair activities;
(f) CEMS calibration and cylinder gas audit results;
(g) CEMS maintenance and repair activities;
(h) Differential pressure across each catalyst bed monitored continuously and recorded once per workshift;
(i) Temperature before and after each catalyst bed monitored continuously and recorded once per workshift;
(j) Hourly ammonia consumption (lbs);
(k) Average hourly NOx and CO emission concentration (ppmvd @ 15% O2);
(l) Average hourly O2 concentration (dry volume percent);

M6. Combustion Turbine General Emissions Monitoring  
WAC 173-401-615(1), WAC 173-406-106(2)  
ADP 95-1800R5, Condition 31

This monitoring requirement applies to Req-6, 25, 26, 27, 28, 31, 34

The permittee shall determine the fuel sulfur content of natural gas combusted in the Combustion Turbine on an annual basis in accordance with 40 CFR 75.11. Fuel sampling results shall be reported to SWCAA as described in Section R8 of this permit.

Hourly SO2 emission rates shall be calculated from contemporaneous heat input values and the most recent sulfur content monitoring results in accordance with 40 CFR Part 75 Appendix D. For pipeline natural gas, an emission factor of 0.0006 lb/MMBtu may be used to calculate emissions. For natural gas that does not qualify as pipeline natural gas, SO2 emissions shall be calculated using equation D1-h of 40 CFR 75 and actual fuel sulfur content as provided in 40 CFR 75, Appendix D, Section 2.3.
Hourly VOC, PM and NH₃ emissions shall be calculated from contemporaneous heat input values and the most recent emission test data for the Combustion Turbine.

**M7. Combustion Turbine NOₓ and CO Emissions Monitoring**

This monitoring requirement applies to Req-23, 24, 34

40 CFR 60, App B & F, 40 CFR 75
WAC 173-406-106(2)
ADP 95-1800R5, Conditions 21 & 30

The CEMS/DAHS for NOₓ and O₂ shall be installed and maintained in accordance with the requirements and specifications found in 40 CFR 75 – Continuous Emissions Monitoring. Hourly NOₓ emission rates (lb/MMBtu) shall be calculated based on the monitored NOₓ concentration (ppmv) and diluent concentration (dry volume percent O₂) in accordance with the procedures in 40 CFR 75, Appendix F. Hourly NOₓ emissions (lb/hr) shall be calculated using the hourly NOₓ emission rate and the average heat input to the turbine as determined in M5.

Relative accuracy test audits (RATA) shall be conducted for each CEMS as specified in the applicable performance specification. RATA reports shall be submitted to SWCAA within 45 days of test completion and shall include all of the source test information required in R9 of this permit. Records of monitoring activities shall be maintained in accordance with Section K2 of this permit.

**M8. Combustion Turbine Startup and Shutdown Emissions**

This monitoring requirement applies to Req-29

40 CFR 60, Appendix B - Performance Specification 4A "Specifications and Test Procedures for Carbon Monoxide Continuous Emission Monitoring Systems in Stationary Sources" and 40 CFR 60, Appendix F "Quality Assurance Procedures". Hourly CO emission rates (lb/MMBtu) shall be calculated based on the monitored CO concentration (ppmv) and diluent concentration (dry volume percent O₂) in accordance with Equation 19-1 from 40 CFR Part 60 Appendix A. Hourly CO emissions (lb/hr) shall be calculated using the hourly CO emission rate and the average heat input to the turbine as determined in M5.

Relative accuracy test audits (RATA) shall be conducted for each CEMS as specified in the applicable performance specification. RATA reports shall be submitted to SWCAA within 45 days of test completion and shall include all of the source test information required in R9 of this permit. Records of monitoring activities shall be maintained in accordance with Section K2 of this permit.

**M9. Combustion Turbine Emission Testing**

This monitoring requirement applies to Req-23, 24, 25, 26, 27, 28

40 CFR 60, Appendix B - Performance Specification 4A "Specifications and Test Procedures for Carbon Monoxide Continuous Emission Monitoring Systems in Stationary Sources" and 40 CFR 60, Appendix F "Quality Assurance Procedures". Hourly CO emission rates (lb/MMBtu) shall be calculated based on the monitored CO concentration (ppmv) and diluent concentration (dry volume percent O₂) in accordance with Equation 19-1 from 40 CFR Part 60 Appendix A. Hourly CO emissions (lb/hr) shall be calculated using the hourly CO emission rate and the average heat input to the turbine as determined in M5.

Relative accuracy test audits (RATA) shall be conducted for each CEMS as specified in the applicable performance specification. RATA reports shall be submitted to SWCAA within 45 days of test completion and shall include all of the source test information required in R9 of this permit. Records of monitoring activities shall be maintained in accordance with Section K2 of this permit.

The Combustion Turbine shall be emission tested for NOₓ, CO and NH₃ on a continuing 12 month cycle in accordance with the protocol found in Appendix A of this permit. Emission test reports shall be submitted
to SWCAA as described in Section R9 of this permit. Tested emission concentrations from the Combustion Turbine shall be corrected to units that correspond to the emission limitations contained in this permit. Tested NOx concentrations shall also be corrected to 15% O2.

Initial emission testing for the Combustion Turbine was conducted on September 11-12, 1997 and October 23, 1997. The initial testing quantified emissions of NOx, CO, SO2, PM, VOC, and NH3.

40 CFR 60.49b(d) & (p)

M10. Startup Boiler Operations Monitoring ADP 95-1800R5, Condition 26

This monitoring requirement applies to Req-36, 37, 38, 39, 40, 42

The permittee shall monitor and record the operational parameters listed below for each day of startup boiler operation:

(a) Calendar date;
(b) Hours of operation;
(c) Hourly steam load;
(d) Fuel consumption; and
(e) Maintenance and repair activity.

A calculation of the annual capacity factor shall be made at the end of each calendar month. The annual capacity factor of the Startup Boiler shall be calculated by dividing actual annual heat input by potential annual heat input for the preceding 12 consecutive month period.

Monthly emissions of NOx and CO shall be calculated from recorded heat input and the most recent emission test data. Emission calculations shall use the following equation:

\[
\text{Emissions (lb/mth)} = \frac{(\text{Emission Factor lb/MMBtu}) \times (\text{Heat Input/Month})}{(\text{Hours of Operation/Month})}
\]

Monthly emissions of PM, VOC, and SO2 shall be calculated based on recorded fuel consumption and the following emission factors:

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Emission Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>PM</td>
<td>0.0039 lb/MMBtu</td>
</tr>
<tr>
<td>VOC</td>
<td>0.0011 lb/MMBtu</td>
</tr>
<tr>
<td>SO2</td>
<td>0.0006 lb/MMBtu</td>
</tr>
</tbody>
</table>

M11. Startup Boiler Emission Testing ADP 95-1800R5, Conditions 32 & 38

This monitoring requirement applies to Req-36, 37, 38, 39, 40

The Startup Boiler shall be emission tested on a continuing 5 year cycle in accordance with the protocol found in Appendix B of this permit. Initial emission testing for the Combustion Turbine was conducted on September 11-12, 1997 and October 23, 1997. The initial source test for the Startup Boiler was conducted on October 25, 1997, and included test methods for VOC and PM.
Emission test reports shall be submitted to SWCAA as described in Section R9 of this permit. Measured pollutant concentrations from the Startup Boiler shall be corrected to dry standard conditions at 3% O₂. Emission rates of NOₓ and CO (lb/MMBtu) shall be calculated based on the tested constituent concentration (ppmv) and diluent concentration (in percent O₂ or CO₂) in accordance with Equation 19-1 from 40 CFR Part 60 Appendix A.

M12. Fuel Gas Heater Monitoring

ADP 95-1800R5, Condition 27

This monitoring requirement applies to Req-43, 44, 45, 46

The permittee shall monitor and record the operational parameters listed below for each month of Fuel Gas Heater operation:

(a) Fuel consumption; and
(b) Hours of operation.

Monthly emissions from the Fuel Gas Heater shall be calculated based on recorded fuel consumption and the following emission factors:

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Emission Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOₓ</td>
<td>0.117 lb/MMBtu</td>
</tr>
<tr>
<td>CO</td>
<td>0.089 lb MMBtu</td>
</tr>
<tr>
<td>PM</td>
<td>0.0115 lb/MMBtu</td>
</tr>
<tr>
<td>VOC</td>
<td>0.038 lb/MMBtu</td>
</tr>
<tr>
<td>SO₂</td>
<td>0.0006 lb/MMBtu</td>
</tr>
</tbody>
</table>

40 CFR 63.6655 & Table 6
ADP 95-1800R5, Condition 28

This monitoring requirement applies to Req-48, 49, 50, 52, 53

The Permittee shall monitor and record the following operational parameters for the Emergency Generator and Emergency Fire Pump:

(a) Each incidence of maintenance and repairs conducted according to the manufacturer's emission related operation and maintenance instructions or the facility developed maintenance plan. Activities to be documented include, but are not limited to, oil and oil filter changes, air cleaner inspections, and inspection of hoses and belts; and
(b) The number of hours of engine operation in each calendar year shall be recorded from the non-resettable hour meter. The permittee shall document how many hours are spent for emergency and nonemergency operation, including what classified the operation as emergency.

Monthly emissions from the Emergency Generator and the Emergency Fire Pump shall be calculated from recorded hours of operation, the respective horsepower rating of each engine, and the following emission factors from AP-42, Table 3.3-2 (5/95):
Pollutant | Emission Factor
--- | ---
NO\textsubscript{x} | 0.031 lb/hp-hr
CO | 6.68E-3 lb/hp-hr
PM | 2.20E-3 lb/hp-hr
TOC | 2.47E-3 lb/hp-hr
SO\textsubscript{2} | 2.05E-3 lb/hp-hr

WAC 173-401-615(1)

**M14. Plantwide Emissions Monitoring**

ADP 95-1800R5, Conditions 1 & 36

This monitoring requirement applies to Req-12, 13, 14, 15, 16, 17

On a monthly basis, the Permittee shall determine the sum of NO\textsubscript{x}, CO, PM, VOC, SO\textsubscript{2} and NH\textsubscript{3} emissions from all emission units at the facility in accordance with applicable monitoring requirements. The Permittee shall use the monthly emission summaries to calculate total plantwide emissions on a 12-month rolling basis (current month plus 11 preceding months).

**M15. Ammonia Concentration Monitoring**

ADP 95-1800R5, Condition 24

This monitoring requirement applies to Req-32

The permittee shall maintain a record of the delivery date and ammonia concentration of each ammonia shipment. A certification from the ammonia supplier can be used to satisfy this requirement.

**VIII. RECORDKEEPING TERMS AND CONDITIONS**

The permittee shall maintain files of all information, including all reports and notifications, recorded in a form suitable and readily available for expeditious inspection and review. The files shall be retained for at least five (5) years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. The recordkeeping requirements listed below do not apply to insignificant emission units (IEUs) pursuant to WAC 173-401-530(2)(c).

WAC 173-401-615(2)

**K1. General Recordkeeping**

ADP 95-1800R5, Conditions 18-20

Permittee is required to keep the following records as applicable:

(a) Inspections and Certifications
   (1) Date and time of the inspection or certification;
   (2) Name and title of the person who conducted the inspection or certification;
   (3) Identification of the unit or activity being inspected or certified;
   (4) Operating conditions of the unit or the type of activity occurring at the time of the inspection or certification;
   (5) Compliance status of each monitored requirement as described in Sections V and VII of this Permit; and
   (6) Description of corrective action (if any) taken in response to a discovered permit deviation, excess emission, upset condition, or malfunction, as applicable.
(b) Complaints
   (1) Date and time of complaint;
   (2) Name of the complainant;
   (3) The nature of the complaint;
   (4) Date and time of follow-up inspection;
   (5) The name and title of the person who conducted the inspection or certification; and
   (6) Description of corrective action (if any) taken in response to complaint.

(c) Sampling and Emissions Testing
   (1) Date sampling was performed;
   (2) Entity that performed the sampling;
   (3) Name and title of the person or the entity that performed the sampling or testing;
   (4) Analytical techniques used to take the sample;
   (5) Operating conditions existing at the time of sampling or measurement to include, as a minimum for emission point source testing:
      (A) Heat input (million Btu/hr) (EU-1 and EU-2);
      (B) Fuel consumption rate (EU-1 and EU-2);
      (C) Air discharge flowrate (dry standard cubic feet);
      (D) Exhaust temperature of emissions out the stack (EU-1 and EU-2);
      (E) Unit load on an hourly basis (EU-1);
   (6) Date analytical analyses (if any) were performed;
   (7) Entity that performed the analyses;
   (8) Analytical techniques or methods used;
   (9) Results of such analyses;
   (10) Compliance status of each monitored requirement as described in Section V and VII of this permit; and
   (11) Description of corrective action taken in response to permit deviations and when action was initiated.

(d) Periodic Monitoring and Emissions Records
   (1) Date and time of parameter observation or emission calculation;
   (2) Name of parameter observed or emission calculated;
   (3) Observed parameter value or calculated emission value with appropriate units; and
   (4) Periods that data was unavailable.

(e) Excess Emissions and Upset Conditions
   (1) Date and time of excess emission or upset condition occurred;
   (2) Nature of the excess emission or upset condition and an identification of the affected unit, process, or activity; and
   (3) Description of corrective action taken in response to a discovered permit deviation, excess emission, upset condition, or malfunction, as applicable.

(f) Maintenance Activities
   (1) Date and time of the maintenance activity;
   (2) Name of the person who performed the maintenance;
   (3) Identification of the unit or activity being maintained; and
   (4) Description of the maintenance being conducted.
K2. Continuous Emission Data Recordkeeping

The permittee shall maintain a file for the Combustion Turbine containing the measurements, data, reports, and general information identified below. The file shall be maintained at the source in a readily accessible form suitable for inspection for at least five (5) years from the date of each record.

(a) General Records
The file shall include the following information for the Combustion Turbine:
(1) The data and information required in (b) through (f) of 40 CFR 75.54;
(2) The supporting data and information used to calculate values required in paragraphs (b) through (f) of 40 CFR 75.54;
(3) The certification test data and information required in 40 CFR 75.56 for tests required under 40 CFR 75.20, beginning with the date of the first certification test performed, and the quality assurance and quality control data and information required in 40 CFR 75.56 for tests and the quality assurance/quality control plan required under 40 CFR 75.21 and Appendix B of 40 CFR 75, beginning with the date of provisional certification;
(4) The current monitoring plan as described in 40 CFR 75.53; and
(5) The quality control plan as described in 40 CFR 75, Appendix B.
(6) Percent monitoring system data availability, (recorded to the nearest tenth of a percent), calculated pursuant to 40 CFR 75.32.

(b) Operating Parameter and Emission Records
The file shall include the following information for each hour of unit operating time for the Combustion Turbine:
(1) Date and hour;
(2) Actual operating time (rounded up to nearest 15 minutes);
(3) Total gross turbine load (rounded to nearest MW_ge);
(4) Total turbine heat input (million Btu); and
(5) Combustion Turbine fuel consumption (MMBtu/hr).
(6) Average NOx concentration (ppmvd @ 15%O2);
(7) Average NOx emission rate (lb/million Btu and lb/hr);
(8) Average CO concentration (ppmvd @ 15%O2);
(9) Average CO emission rate (lb/hr);
(10) Average O2 concentration (% O2); and

IX. REPORTING TERMS AND CONDITIONS
All required reports must be certified by a responsible official consistent with WAC 173-401-520. Where an applicable requirement requires reporting more frequently than once every six months, the responsible official's certification need only be submitted once every six months, covering all required reporting since the date of the last certification. Where a reporting schedule is specified (e.g. quarterly, semi-annual, or annual), compliance with the reporting frequency is met when reports are submitted more frequently than required.
Reports shall be submitted to the following addresses, unless otherwise instructed:

Control Officer ......................................................... U.S. EPA Region X
Southwest Clean Air Agency .......................... Air Operating Permits
11815 NE 99 Street, Suite 1294 ........................ 1200 Sixth Avenue, AWT-107
Vancouver, WA 98682-2322 ........................ Seattle, WA 98101

40 CFR 60.7(b), 40 CFR 64.9(a)(2)(i)
WAC 173-401-615(3)(b)
SWCAA 400-107, SWCAA 400-115

R1. Deviations from Permit Conditions  ADP 95-1800R5, Conditions 34 & 35
The permittee shall report deviations from permit requirements no later than thirty days after the end of the month during which the deviation is discovered. Deviations that represent a potential threat to human health or safety shall be reported as soon as possible but no later than twelve hours after the deviation is discovered. Excess emissions shall be reported as soon as possible. In accordance with SWCAA 400-107(1), excess emissions that the permittee wishes to be considered unavoidable must be reported as soon as possible, but no later than 48 hours after discovery.

All deviation reports shall be submitted in writing (e.g. e-mail, facsimile or letter). Each report shall include the following information:
(a) Identification of the emission unit(s) involved;
(b) Duration of the event including the beginning and end times; and
(c) Description of the event, including:
   (1) Whether or not the deviation was due to an upset condition;
   (2) Probable cause of the deviations; and
   (3) Description of corrective action taken in response to the event (if any).

R2. Complaint Reports  ADP 95-1800R5, Condition 37
The permittee shall report all air pollution related complaints to SWCAA within 3 business days of receipt. Complaint reports shall include the following information:
(a) Date and time of the complaint;
(b) Name of the complainant;
(c) Nature of the complaint; and
(d) Description of corrective action taken in response to complaint (if any).

R3. Startup and Shutdown Reports  ADP 95-1800R5, Condition 39
The Permittee shall report each Combustion Turbine startup and shutdown period to SWCAA within 24 hours of occurrence.
General Information

The Permittee shall submit quarterly reports to SWCAA no later than 30 days after the end of each quarter of the calendar year. Each report must be certified by a responsible official consistent with WAC 173-401-520. Each report shall contain, at a minimum, the following information:

(a) Records of all required monitoring and plant inspections as described in monitoring requirements M1 thru M4. A copy of the relevant opacity certification(s) shall be submitted with the report for all EPA Method 9 and/or SWCAA Method 9 monitoring conducted during the reporting period;

(b) A summary of all deviations from permit conditions that occurred during the reporting period;

(c) Hours of operation for all emission units;

(d) Quantity of fuel burned in emission units EU1, EU2, and EU3;

(e) Ammonia flow for each hour of turbine operation;

(f) Quantity of ammonia used during the reporting period;

(g) Hourly and daily (24-hr) CEMS/DAHS values for each data element identified in Section K2.(b) of this permit;

(h) The results of any/all CEMS calibrations and cylinder gas audits conducted during the quarter.

(i) Identification of any periods during which required CEMS data is not available and an explanation of why the data is missing;

(j) Information required under 40 CFR 60 Subparts Db and GG and other implementing sections such as 40 CFR 60.7 and 40 CFR 60.8 unless provisions have been waived by EPA administrative action;

(k) Annual capacity factor for EU-2 for the previous 12 month period as described in 40 CFR 60.49b(q);

(l) Summary of plantwide emissions of criteria pollutants, volatile organic compounds and ammonia for each month of the reporting period, the total for the reporting period, and the 12-month rolling total.

Acid Rain Data

The permittee's designated representative shall electronically report the data and information identified below in accordance with 40 CFR 75.64 and 75.65. Each electronic report must be submitted to the EPA Administrator within 30 days following the end of each calendar quarter and shall include:

(m) The information and hourly data required in 40 CFR 75.64 and 75.65, excluding the descriptions of adjustments, corrective action, and maintenance, and excluding any information which is incompatible with electronic reporting (e.g., field data sheets, lab analyses, quality control plan, etc.),

(n) Tons (rounded to the nearest tenth) of SO₂ emitted during the quarter and cumulative SO₂ emissions for the calendar year,

(o) Tons of CO₂ emitted during the quarter and cumulative CO₂ emissions for the calendar year, and

(p) Total heat input (million Btu) for the quarter and cumulative heat input for the calendar year;

Consistent with WAC 173-401-615(3) the permittee shall submit to SWCAA by September 15th and March 15th for the six month periods January through June and July through December respectively, a report on the status of all monitoring requirements. All instances of deviation from permit requirements shall be clearly identified. If no deviations occurred, then a statement to that effect shall be submitted.
The semi-annual report shall contain a certification of all reports previously submitted during the semi-annual period that have not already been certified. The certification shall be consistent with WAC 173-401-520. For all EPA Method 9 or SWCAA Method 9 monitoring conducted during the semi-annual period, a copy of the relevant opacity certification(s) shall be submitted with the semi-annual report.

Separate semi-annual reports are not necessary if the permittee elects to provide the above information and certification with each quarterly report.

40 CFR 72.90, 40 CFR 75.60  
R6. Annual Compliance Certification  
WAC 173-401-630(5)  
The permittee shall submit to SWCAA and EPA a certification of compliance with all terms and conditions of this permit in accordance with WAC 173-401-630(5)(d). The permittee shall submit the following information by March 15th for the previous calendar year:
(a) Identification of each term or condition of the permit that is the basis of the certification;
(b) Statement of compliance status;
(c) Whether compliance was continuous or intermittent;
(d) Method(s) used for determining the compliance status of the source, currently and over the reporting period consistent with WAC 173-401-615;
(e) Such other facts as SWCAA may require to determine the compliance status of the source; and
(f) Such additional requirements as may be specified pursuant to Sections 114(a)(3) and 504(b) of the FCAA.

SWCAA 400-105  
R7. Emission Inventory Reports  
ADP 95-1800R5, Condition 33  
The permittee shall submit an inventory of annual emissions for each calendar year to SWCAA by March 15th of the following year in accordance with SWCAA 400-105, unless an alternate date is approved by SWCAA. The inventory shall include stack and fugitive emissions of NO\textsubscript{x}, SO\textsubscript{2}, CO, VOC, PM, and TAPs. TAP emissions shall be calculated consistent with the emission factors and methodology presented in the Technical Support Document for ADP 95-1800R5. The inventory shall include stack and fugitive emissions of NO\textsubscript{x}, SO\textsubscript{2}, CO, VOC, PM, PM\textsubscript{10}, PM\textsubscript{2.5}, hazardous air pollutants, and toxic air pollutants (as defined in WAC 173-460, effective 8/21/98).

R8. Fuel Sulfur Content Reports  
ADP 95-1800R5, Condition 38  
The permittee shall report the results of each fuel sulfur sampling to SWCAA within 45 days of test completion. Each test report shall include:
(a) Time and date of the fuel sampling;
(b) A summary of sampling results. Fuel sulfur content results shall, at a minimum, be reported in units of gr/100 scf and lb/MMBtu;
(c) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation;
(d) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
(e) Chain of custody information; and
(f) Discussion of any abnormalities associated with the results.
The permittee shall do the following for each emission test:

(a) Submit a comprehensive test plan to SWCAA for review and approval at least ten business days prior to any periodic testing;

(b) Notify SWCAA at least five business days in advance of any periodic testing so that SWCAA personnel may be present during testing;

(c) Report a summary of operating conditions for each test run as specified in ADP 95-1800R5, Appendices A and C;

(d) Report required test results to SWCAA within 45 days of test completion. All gaseous emissions shall, as a minimum, be reported in parts per million by volume, pounds per hour, and pounds per million Btu of heat input. Emissions data shall be corrected to units that correspond to the applicable standard. Each required source test report shall include:

(1) A description of the source including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations,

(2) Time and date of the test and identification and qualifications of the personnel involved,

(3) A summary of results, reported in units and averaging periods consistent with the applicable emission standard or limit,

(4) A summary of control system or equipment operating conditions,

(5) A summary of production related parameters,

(6) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation,

(7) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,

(8) Copies of field data and example calculations,

(9) Chain of custody information,

(10) Calibration documentation,

(11) Discussion of any abnormalities associated with the results, and

(12) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.

The designated representative shall comply with all Acid Rain Program reporting requirements in accordance with 40 CFR 75.60 and with the signatory requirements of 40 CFR 72.21.

The permittee or designated representative shall submit written notification to SWCAA and EPA Region X of certification tests, recertification tests, and revised test dates as specified in 40 CFR 75.20 for CEMS in accordance with 40 CFR 75.61. The designated representative shall submit applications and reports in accordance with 40 CFR 75.63.
X. NON-APPLICABLE TERMS AND CONDITIONS

The following lists all federal, state, and/or local requirements that might reasonably apply to the permittee, but are deemed nonapplicable after review by SWCAA. In accordance with WAC 173-401-640, the permittee is provided a permit shield for not complying with the requirements listed below where they have been identified to be non-applicable to specific emission units.

N1. Standards of Performance for Stationary Compression Ignition Internal Combustion Engines
40 CFR 60, Subpart IIII
SWCAA 400-115

Subpart IIII establishes performance standards for applicable to operators of stationary compression ignition (CI) internal combustion engines (ICE) that are manufactured after April 1, 2006 (except a fire pump engine), manufactured as a certified National Fire Protection Association (NFPA) fire pump engine after July 1, 2006, or modified/reconstructed after July 11, 2005. This facility has two compression ignition internal combustion engine emission units (emergency generator, fire pump). Both the units were manufactured prior to April 1, 2006, and have not been modified or reconstructed. Therefore, this regulation is not applicable.

N2. Standards of Performance for Stationary Combustion Turbines
40 CFR 60, Subpart KKKK
SWCAA 400-115

Subpart KKKK establishes performance standards for stationary combustion turbines with a heat input at peak load equal to or greater than 10.7 gigajoules (10 MMBtu) per hour, which commenced construction, modification, or reconstruction after February 18, 2005. The Combustion Turbine at this facility commenced construction prior to February 18, 2005 so this regulation is not applicable.

40 CFR 63, Subpart Q
SWCAA 400-075

Subpart Q establishes performance standards for all new and existing industrial process cooling towers that are operated with chromium-based water treatment chemicals on or after September 8, 1994. The cooling towers at this facility do not use chromium-based water treatment chemicals, therefore, this requirement is not applicable.

40 CFR 63, Subpart YYYY
SWCAA 400-075

Subpart YYYY establishes performance standards for any existing, new, or reconstructed combustion turbine located at a facility that is a major source of hazardous air pollutant emissions. This facility is not a major source of hazardous air pollutant emissions, therefore, this requirement is not applicable.

40 CFR 63.6650

Portions of 40 CFR 63.6650 infer that semi-annual compliance reports are required for existing emergency CI engines. However, there are no reporting requirements listed as being applicable to these units in Table 7 (which summarized the requirements of the section), and it seems inappropriate to require emergency engines subject to no numeric emission or operating limit to submit semi-annual compliance status reports. Furthermore, EPA’s response to comments on the proposed rule indicates
that this was not the intent of the rule. In a memorandum dated February 17, 2010 from Melanie King to EPA Docket EPA-HQ-OAR-2008-0708, EPA wrote:

"EPA agrees with the commenter that semi-annual compliance reporting, and other types of reporting required under the General Provisions of 40 CFR part 63 are not appropriate for area sources that are not subject to numerical emission standards. EPA believes that recording information and maintaining records will provide EPA with assurance that facilities are meeting the work/management practices and other requirements applicable to their existing stationary engines. Further, EPA believes it is appropriate to extend the same approach to any sources that are not subject to numerical emission standards, including existing stationary CI engines less than 100 HP and existing stationary emergency CI engines."

Therefore, emergency engines at this facility are not required to submit semiannual compliance reports.

Subpart DDDDD establishes performance standards for any existing, new, or reconstructed industrial, commercial, or institutional boiler or process heater located at a facility that is a major source of hazardous air pollutant emissions. This facility is not a major source of hazardous air pollutant emissions, therefore, this requirement is not applicable.

Subpart JJJJJJ establishes performance standards for existing, new, or reconstructed industrial, commercial, and institutional boilers located at a facility that is an area source of hazardous air pollutant emissions. This facility has one emission unit that meets the definition of an industrial boiler (EU2). The boiler in question is a natural gas fired steam boiler with a rated heat input of 103.5 MMBtu/hr. The boiler is classified as a "gas fired boiler", which is not subject to the regulation pursuant to 40 CFR 63.11195(e). Therefore, this requirement is not applicable.

N8. Compliance Assurance Monitoring 40 CFR 64
40 CFR 64 establishes criteria that define what monitoring should be conducted by a source owner or operator to provide a reasonable assurance there is compliance with emission limits and standards in order to certify compliance under the Title V operating permit program. Since the turbine, EU-1, is subject to the Acid Rain Program requirements for NOx and has a continuous compliance determination method for CO (CO CEM), the permittee is exempt from 40 CFR 64 requirements pursuant to 40 CFR 64.2(b)(1)(iii) and 64.2(b)(1)(vi).

40 CFR 98 establishes mandatory reporting requirements for greenhouse gas (GHG) emissions from selected stationary source categories in the United States. Pursuant to 40 CFR 89.3, facilities subject to this regulation must submit GHG emissions reports to the Administrator, as specified in paragraphs (a) through (g) of that section, for calendar year 2010 and each subsequent calendar year. This regulation was proposed on April 10, 2009 (74FR16609) and finalized on September 22, 2009. In the preamble of
the final promulgation, EPA responded to a question regarding whether the reporting requirements constitute an applicable requirement for the purposes of Title V. The response indicates that they are not.

As currently written, the definition of "applicable requirement" in 40 CFR 70.2 and 71.2 does not include a monitoring rule such as today's action, which is promulgated under CAA sections 114(a)(1) and 208. [http://www.epa.gov/climatechange/emissions/ghgrulemaking.html](http://www.epa.gov/climatechange/emissions/ghgrulemaking.html)

WAC 173-407 sections 010 through 080 require new and modified fossil-fueled thermal electric generating facilities to mitigate associated CO₂ emissions. The regulation is intended to implement the provisions of Chapter 80.70 RCW. Pursuant to WAC 173-407-030(3)&(4), Part I requirements are applicable to facilities with station-generating capability of more than twenty-five thousand kilowatts, but less than three hundred fifty thousand kilowatts for which an application for initial approval or qualifying modification is submitted after July 1, 2004. This facility has a station-generating capability of approximately 248 thousand kilowatts, and was approved prior to July 1, 2004. No qualifying modifications have taken place since original approval. Therefore, this regulation is not applicable at this time.

WAC 173-407 sections 100 through 240 establish a greenhouse gas emissions performance standard for baseload electric generation facilities. The cited rule sections also govern the content and submittal of sequestration plans for affected facilities. The regulation is intended to implement the provisions of Chapter 80.80 RCW. Pursuant to WAC 173-407-120, the regulation applies to baseload fossil fuel-fired electric generation units that receive approval after June 30, 2008 or existing facilities that undergo any of the actions listed in WAC 173-407-120(3). The regulation is not applicable to this facility because the onsite electric generation unit commenced operation prior to June 30, 2008 and has not undergone any of the actions cited in WAC 173-407-120(3).

N12. Requirements for New Sources in Nonattainment Areas SWCAA 400-112

The permittee is not located in a nonattainment area for any criteria pollutant; therefore, this regulation is not applicable.

N13. Bubble Rules SWCAA 400-120

The permittee has not requested an emission bubble for any regulated pollutant. Therefore, this regulation is not applicable.
N14. Emission Reduction Credits

The cited rule sections govern the creation, maintenance, and use of emission reduction credits within the Agency’s jurisdiction. Conditions for the issuance of credits are detailed in SWCAA 400-131(3). Allowed uses for emission reduction credits are detailed in SWCAA 400-130(2). The permittee has not requested to create or use any emission reduction credits (ERCs). Therefore, this regulation is not applicable.

N15. Source Registration Program

SWCAA 400-100 implements SWCAA’s source registration program. Pursuant to SWCAA 400-100(1)(b) sources subject to the Air Operating Permit program (WAC 173-401) are exempt from the registration program. Therefore, the registration program is not applicable to this facility.
APPENDIX A
Emission Testing Requirements / Combustion Turbine

1. Introduction:
The purpose of these emission testing requirements is to quantify emissions from the Combustion Turbine, and demonstrate compliance with the requirements of this Permit and applicable air quality regulations.

2. Testing Requirements:
   a. Test plan. A comprehensive test plan shall be submitted to SWCAA for review and approval at least 10 business days prior to testing. SWCAA personnel shall be informed at least five business days prior to testing so that a representative may be present during the test.

   b. Testing schedule. Emission testing shall be conducted on a 12 month cycle, no later than the end of October each year. The initial source test for the Combustion Turbine was conducted on September 11-12, 1997 and October 23, 1997. Tested pollutants included NO₃, CO, SO₂, PM, VOC, and NH₃.

   c. Test runs/Reference test methods. Testing for each identified constituent pollutant shall consist of at least three test runs of the specified duration. All sampling shall be conducted at the outlet of the turbine/HRSG. Compliance with applicable emission limits shall be demonstrated by averaging the results of individual test runs. The test methods identified below shall be used unless alternate methods are approved in writing by SWCAA in advance of the emission testing. Relative Accuracy Test Audit (RATA) sampling runs for NOₓ and CO may be used to comply with the annual emission testing requirement for those constituents (i.e., (3) 21-minute RATA runs = (1) 60-minute emission test run).

</tbody>
</table>

3. Source Operation:
   a. Source operation. The Combustion Turbine shall be operated at loads greater than 95% for the duration of testing.

   b. Record of production parameters. Production related parameters and equipment operating conditions shall be recorded during emissions testing to correlate operating conditions with emissions. Recorded parameters shall, at a minimum, include fuel input, turbine output, process startups and shutdowns, and plant adjustments. All recorded production parameters shall be documented in the emission test report.
4. Reporting Requirements:
   a. **Test report.** A final emission test report shall be prepared and submitted to SWCAA within 45 calendar days of test completion and, at a minimum, shall contain the following information:
      (1) Description of the source including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations,
      (2) Time and date of the test and identification and qualifications of the personnel involved,
      (3) Summary of results, reported in units and averaging periods consistent with the application emissions standard or unit,
      (4) Summary of control system or equipment operating conditions,
      (5) Summary of production related parameters,
      (6) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation,
      (7) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
      (8) Copies of field data and example calculations,
      (9) Chain of custody information,
      (10) Calibration documentation,
      (11) Discussion of any abnormalities associated with the results, and
      (12) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.
   
   b. **Oxygen correction.** All test results for constituent emission concentration shall be corrected to 15% oxygen.
APPENDIX B
Emission Testing Requirements / Startup Boiler

1. Introduction:
The purpose of these emission testing requirements is to quantify emissions from the startup boiler, and demonstrate compliance with the requirements of this Permit and applicable air quality regulations.

2. Testing Requirements:
a. Test plan. A comprehensive test plan shall be submitted to SWCAA for review and approval at least 10 business days prior to each test. SWCAA personnel shall be informed at least five business days prior to testing so that a representative may be present during the test.

b. Testing schedule. Emission testing shall be conducted on a (5) year cycle, no later than the end of October of the respective year. The initial source test for the startup boiler was conducted on October 25, 1997. Tested pollutants included NOₓ, CO, PM, and VOC.

c. Test runs/Reference test methods. Testing for each identified constituent shall consist of at least (3) sampling runs of the specified duration. All sampling shall be conducted at the outlet of the startup boiler. Compliance with applicable emission limits shall be demonstrated by averaging the results of individual sampling runs. The test methods identified below shall be used unless alternate methods are approved in writing by SWCAA in advance of the emission testing.

3. Source Operation:
a. Source operation. The startup boiler shall be operated at maximum achievable operating capacity for the duration of testing.

b. Record of production parameters. Production related parameters and equipment operating conditions shall be recorded during emissions testing to correlate operating conditions with emissions. Recorded parameters shall, at a minimum, include fuel consumption, steam production, and plant adjustments. All recorded production parameters shall be documented in the test results report.

4. Reporting Requirements:
a. Test report. A final emission test report shall be prepared and submitted to SWCAA within 45 calendar days of test completion and, at a minimum, shall contain the following information:
   (1) Description of the source including manufacturer, model number and design capacity of the
equipment, and the location of the sample ports or test locations,
(2) Time and date of the test and identification and qualifications of the personnel involved,
(3) Summary of results, reported in units and averaging periods consistent with the application emissions standard or unit,
(4) Summary of control system or equipment operating conditions,
(5) Summary of production related parameters,
(6) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation,
(7) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
(8) Copies of field data and example calculations,
(9) Chain of custody information,
(10) Calibration documentation,
(11) Discussion of any abnormalities associated with the results, and
(12) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.

b. **Oxygen correction.** All test results for constituent emission concentration shall be corrected to 3% oxygen.
APPENDIX C
Acid Rain Permit No. SW-ARP-2-R2

Issued to: River Road Generating Plant
Operated by: Clark Public Utilities
Address: 5509 NW Lower River Road (SR 501)
          Vancouver, WA 98666
ORIS code: 07605
Affected unit: Turbine (Unit #1)

Effective Date: This Acid Rain permit will become effective concurrent with the renewal of the associated Title V permit for the River Road Generating Plant (SW99-9-R2). The Acid Rain permit shall have a permit term of 5 years from the above effective date.

Acid Rain Permit Contents

1) Statement of Basis.
2) Comments, notes and justifications regarding permit decisions and changes made to the permit application forms during the review process, and any additional requirements or conditions as per WAC 173-406-501, Acid Rain Permit Contents.
3) SO₂ allowances allocated under this permit and NOₓ requirements for each affected unit.
4) Standard Requirements. The owners and operators of each affected unit must comply with the standard requirements and special provisions set forth in the permit application, this permit and WAC 173-406-106 "Standard Requirements".
5) Permit Application.

1) Statement of Basis
Statutory and Regulatory Authorities: In accordance with Washington Administrative Code (WAC) 173-406 "Acid Rain Regulation" and WAC 173-401 "Operating Permit Regulation," the Southwest Clean Air Agency issues this permit pursuant to WAC 173-406 and WAC 173-401. WAC 173-406 is based on the provisions of Title 40 Code of Federal Regulations (CFR) parts 72-76, which is part of the requirements established pursuant to Title IV of the Clean Air Act, 40 U.S.C. 7401, et seq., as amended by Public Law 101-549 (November 15, 1990).

2) Comments, Notes and Justifications
This Acid Rain Permit is deemed to incorporate the definition of terms under WAC 173-406-101 unless otherwise expressly defined in this permit.
3) **SO₂ Allowance Allocations and NOₓ Requirements**

**Table Footnotes**

<sup>a</sup> Pursuant to 40 CFR 72.9(c)(i) and WAC 173-406-106(3)(a)(i) this unit is required to hold SO₂ allowances, as of the allowance transfer deadline, in the unit's compliance subaccount not less than the total annual emissions of sulfur dioxide from the unit for the previous calendar year.

<sup>b</sup> This acid rain permit shall not be construed to exempt or exclude an affected unit from compliance with any other provisions of the Clean Air Act consistent with 40 CFR 72.9(h) and WAC 173-406-106(8). An SO₂ emission limitation has been established for the Combustion Turbine in ADP 95-1800R5, and is included as an applicable requirement in the Air Operating Permit for the River Road Generating Plant.

<sup>c</sup> Since this unit is not a coal fired unit, there are no applicable acid rain NOₓ emission limits and a Phase II NOₓ permit application is not required. A NOₓ emission limitation has been established for the Combustion Turbine in ADP 95-1800R5, and is included as an applicable requirement in the Air Operating Permit for the River Road Generating Plant.

4) **Standard Requirements**

**Permit Requirements**

1. The designated representative of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall:
   1. Submit a complete Acid Rain permit application (including a compliance plan) under 40 CFR part 72 in accordance with the deadlines specified in 40 CFR 72.30 and WAC 173-406-301; and
   2. Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review an Acid Rain permit application and issue or deny an Acid Rain permit.

2. The owners or operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall:
   1. Operate the unit in compliance with a complete Acid Rain permit application or a superseding Acid Rain permit issued by the permitting authority; and
   2. Have an Acid Rain permit.

**Monitoring Requirements**

1. The owners and operators and, to the extent applicable, designated representative of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall comply with the monitoring requirements as provided in 40 CFR part 75.

2. The emissions measurements recorded and reported in accordance with 40 CFR Part 75 shall be used to determine compliance by the unit with the Acid Rain emissions limitations and emissions reduction requirements for sulfur dioxide and nitrogen oxides under the Acid Rain program.

3. The requirements of 40 CFR Part 75 shall not affect the responsibility of the owners and operator to monitor emissions of other pollutants or other emissions characteristics at the unit.
under other applicable requirements of the Act, applicable requirements of Title 173 WAC, and other provisions of the operating permit for the River Road Generating Plant.

**Sulfur Dioxide Requirements**

(1) The owners and operator of the River Road Generating Plant and each affected unit at the River Road Generating plant shall:

   (i) Hold allowances, as of the allowance transfer deadline, in the unit's compliance subaccount (after deductions under 40 CFR 73.34(c)), or in the compliance subaccount of another affected unit at the same source to the extent provided in 40 CFR 73.35(b)(3), not less than the total annual emissions of sulfur dioxide for the previous calendar year from the affected unit; and

   (ii) Comply with the applicable Acid Rain emissions limitations for sulfur dioxide.

(2) Each ton of sulfur dioxide emitted in excess of the Acid Rain emissions limitations for sulfur dioxide shall constitute a separate violation of the Act.

(3) An affected unit shall be subject to the requirements under paragraph (1) of the sulfur dioxide requirements as follows:

   (i) Starting January 1, 2000, an affected unit under WAC 173-406-103(1)(b); or

   (ii) Starting on the later of January 1, 2000 or the deadline for monitor certification under 40 CFR part 75, an affected unit under WAC 173-406-103(1)(c).

(4) Allowances shall be held in, deducted from, or transferred among Allowance Tracking System accounts in accordance with the Acid Rain Program.

(5) An allowance shall not be deducted in order to comply with the requirements under paragraph (1) of the sulfur dioxide requirements prior to the calendar year for which the allowance was allocated.

(6) An allowance allocated by the Administrator under the Acid Rain Program is a limited authorization to emit sulfur dioxide in accordance with the Acid Rain Program. No provision of the Acid Rain Program, the Acid Rain permit application, the Acid Rain permit, or an exemption under 40 CFR 72.7, 40 CFR 72.8, WAC 174-406-104, or WAC 173-406-105 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such an authorization.

(7) An allowance allocated by the Administrator under the Acid Rain Program does not constitute a property right.

**Nitrogen Oxides Requirements**

The owners and operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall comply with the applicable Acid Rain emissions limitation for nitrogen oxides.

**Excess Emissions Requirements**

(1) The designated representative of an affected unit that has excess emissions in any calendar year shall submit a proposed offset plan, as required under 40 CFR Part 77.

(2) The owners and operators of an affected unit that has excess emissions in any calendar year shall:

   (i) Pay without demand the penalty required, and pay upon demand the interest on that penalty, as required by 40 CFR part 77; and

   (ii) Comply with the terms of an approved offset plan, as required by 40 CFR Part 77.

**Recordkeeping and Reporting Requirements**
(1) Unless otherwise provided, the owners and operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the Administrator or permitting authority:

(i) The certificate of representation for the designated representative for the source and each affected unit at the source and all documents that demonstrate the truth of the statements in the certification of representation, in accordance with 40 CFR 72.24; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation changing the designated representative;

(ii) All emissions monitoring information, in accordance with 40 CFR part 75, provided that to the extent that 40 CFR part 75 provides for a 3-year period for recordkeeping, the 3-year period shall apply;

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the Acid Rain Program; and

(iv) Copies of all documents used to complete an Acid Rain permit application and any other submission under the Acid Rain Program or to demonstrate compliance with the requirements of the Acid Rain Program.

(2) The designated representative of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall submit the reports required under the Acid Rain Program, including those under 40 CFR part 72 and 40 CFR part 75.

Liability

(1) Any person who knowingly violates any requirement or prohibition of the Acid Rain Program, a complete Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7, 40 CFR 72.8, WAC 173-406-104, or WAC 173-406-105, including any requirement for the payment of any penalty owed to the United States, shall be subject to enforcement pursuant to section 113(c) of the Act and by the permitting authority pursuant to Revised Code of Washington (RCW) 70.94.430, RCW 70.94.431 and RCW 70.94.435.

(2) Any person who knowingly makes any false, material statement in any record, submission, or report under the Acid Rain Program shall be subject to criminal enforcement pursuant to section 113(c) of the Act and 18 U.S.C. 1001 and by the permitting authority pursuant to RCW 70.94.430.

(3) No permit revision shall excuse any violation of the requirements of the Acid Rain Program that occurs prior to the date that the revision takes effect.

(4) The River Road Generating Plant and each affected unit at the River Road Generating Plant shall meet the requirements of the Acid Rain Program.

(5) Any provision of the Acid Rain Program that applies to the River Road Generating Plant (including a provision applicable to the designated representative of an affected unit) shall also apply to the owners and operators of the River Road Generating Plant and to the affected units at the River Road Generating Plant.

(6) Any provision of the Acid Rain Program that applies to an affected unit at the River Road Generating Plant (including a provision applicable to the designated representative of an affected unit) shall also apply to the owners and operators of such unit.
(7) Each violation of a provision of WAC 173-406-100 through 173-406-950 and 40 CFR parts 72, 73, 75, 76, 77, and 78, and regulations implementing section 410 of the Act by an affected source or affected unit, or by an owner or operator or designated representative of such source or unit, shall be a separate violation of the Act.

Effect on Other Authorities
No provision of the Acid Rain Program, an Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8 shall be construed as:

(1) Except as expressly provided in title IV of the Act, exempting or excluding the owners and operators and, to the extent applicable, the designated representative of an affected source or affect unit from compliance with any other provision of the Act, including the provisions of Title I of the Act relating to applicable National Ambient Air Quality Standards or State Implementation Plans;

(2) Limiting the number of allowances a unit can hold; provided, that the number of allowances held by the unit shall not affect the source's obligation to comply with any other provisions of the Act;

(3) Requiring a change of any kind in any state law regulating electric utility rates and charges, affecting any state law regarding such state regulation, or limiting such state regulation, including any prudence review requirements under such state law;

(4) Modifying the Federal Power Act or affecting the authority of the Federal Energy Regulatory Commission under the Federal Power Act; or

(5) Interfering with or impairing any program for competitive bidding for power supply in a state in which such program is established.

5) Permit Application
A permit application for a gas-fired combustion turbine (Unit ID #1) was received by SWCAA on March 17, 2008. The signature date on the permit application was January 31, 2008. A copy of the permit application is included below.

Permit Requirements

(1) The designated representative of each affected source and each affected unit at the source shall:
   (i) Submit a complete Acid Rain permit application (including a compliance plan) under
       40 CFR part 72 in accordance with the deadlines specified in 40 CFR 72.30; and
   (ii) Submit in a timely manner any supplemental information that the permitting authority
determines is necessary in order to review an Acid Rain permit application and issue
or deny an Acid Rain permit;
(2) The owners and operators of each affected source and each affected unit at the
source shall:
   (i) Operate the unit in compliance with a complete Acid Rain permit application or a
superseding Acid Rain permit issued by the permitting authority; and
   (ii) Have an Acid Rain Permit.

Monitoring Requirements

(1) The owners and operators and, to the extent applicable, designated representative of
each affected source and each affected unit at the source shall comply with the monitoring
requirements as provided in 40 CFR part 75
(2) The emissions measurements recorded and reported in accordance with 40 CFR part
75 shall be used to determine compliance by the unit with the Acid Rain emissions
limitations and emissions reduction requirements for sulfur dioxide and nitrogen oxides
under the Acid Rain Program.
(3) The requirements of 40 CFR part 75 shall not affect the responsibility of the owners
and operators to monitor emissions of other pollutants or other emissions characteristics
at the unit under other applicable requirements of the Act and other provisions of the
operating permit for the source.

Sulfur Dioxide Requirements

(1) The owners and operators of each source and each affected unit at the source shall:
   (i) Hold allowances, as of the allowance transfer deadline, in the unit's compliance
subaccount (after deductions under 40 CFR 73.34(c)), or in the compliance subaccount
of another affected unit at the same source to the extent provided in 40 CFR
73.35(b)(3), not less than the total annual emissions of sulfur dioxide for the previous
calendar year from the unit; and
   (ii) Comply with the applicable Acid Rain emissions limitations for sulfur dioxide.
(2) Each ton of sulfur dioxide emitted in excess of the Acid Rain emissions limitations for
sulfur dioxide shall constitute a separate violation of the Act.
(3) An affected unit shall be subject to the requirements under paragraph (1) of the sulfur
dioxide requirements as follows:
   (i) Starting January 1, 2000, an affected unit under 40 CFR 72.8(a)(2); or
   (ii) Starting on the later of January 1, 2000 or the deadline for monitor certification
under 40 CFR part 75, an affected unit under 40 CFR 72.8(a)(3).
(4) Allowances shall be held in, deducted from, or transferred among Allowance Tracking
System accounts in accordance with the Acid Rain Program.
(5) An allowance shall not be deducted in order to comply with the requirements under
paragraph (1) of the sulfur dioxide requirements prior to the calendar year for which the
allowance was allocated.
(6) An allowance allocated by the Administrator under the Acid Rain Program is a limited
authorization to emit sulfur dioxide in accordance with the Acid Rain Program. No
provision of the Acid Rain Program, the Acid Rain permit application, the Acid Rain permit,
or an exemption under 40 CFR 72.7 or 72.8 and no provision of law shall be construed
to limit the authority of the United States to terminate or limit such authorization.
(7) An allowance allocated by the Administrator under the Acid Rain Program does not
constitute a property right.

EPA Form 7610-16 (rev. 12-03)
Nitrogen Oxides Requirements. The owners and operators of the source and each affected unit at the source shall comply with the applicable Acid Rain emissions limitation for nitrogen oxides.

Excess Emissions Requirements

(1) The designated representative of an affected unit that has excess emissions in any calendar year shall submit a proposed offset plan, as required under 40 CFR part 77.
(2) The owners and operators of an affected unit that has excess emissions in any calendar year shall:
   (i) Pay without demand the penalty required, and pay upon demand the interest on that penalty, as required by 40 CFR part 77; and
   (ii) Comply with the terms of an approved offset plan, as required by 40 CFR part 77.

Recordkeeping and Reporting Requirements

(1) Unless otherwise provided, the owners and operators of the source and each affected unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the Administrator or permitting authority:
   (i) The certificate of representation for the designated representative for the source and each affected unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation, in accordance with 40 CFR 72.24; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation changing the designated representative;
   (ii) All emissions monitoring information, in accordance with 40 CFR part 75, provided that to the extent that 40 CFR part 75 provides for a 3-year period for recordkeeping, the 3-year period shall apply.
   (iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the Acid Rain Program; and,
   (iv) Copies of all documents used to complete an Acid Rain permit application and any other submission under the Acid Rain Program or to demonstrate compliance with the requirements of the Acid Rain Program.

(2) The designated representative of an affected source and each affected unit at the source shall submit the reports and compliance certifications required under the Acid Rain Program, including those under 40 CFR part 72 subpart I and 40 CFR part 75.

Liability

(1) Any person who knowingly violates any requirement or prohibition of the Acid Rain Program, a complete Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8, including any requirement for the payment of any penalty owed to the United States, shall be subject to enforcement pursuant to section 113(c) of the Act.

(2) Any person who knowingly makes a false, material statement in any record, submission, or report under the Acid Rain Program shall be subject to criminal enforcement pursuant to section 113(c) of the Act and 18 U.S.C. 1001.

(3) No permit revision shall excuse any violation of the requirements of the Acid Rain Program that occurs prior to the date that the revision takes effect.

(4) Each affected source and each affected unit shall meet the requirements of the Acid Rain Program.
Liability, Cont'd.

(5) Any provision of the Acid Rain Program that applies to an affected source (including a provision applicable to the designated representative of an affected source) shall also apply to the owners and operators of such source and of the affected units at the source.

(6) Any provision of the Acid Rain Program that applies to an affected unit (including a provision applicable to the designated representative of an affected unit) shall also apply to the owners and operators of such unit. Except as provided under 40 CFR 72.44 (Phase II repowering extension plans) and 40 CFR 76.11 (NOx averaging plans), and except with regard to the requirements applicable to units with a common stack under 40 CFR part 75 (including 40 CFR 75.16, 75.17, and 75.18), the owners and operators and the designated representative of one affected unit shall not be liable for any violation by any other affected unit of which they are not owners or operators of the designated representative and that is located at a source of which they are not owners or operators or the designated representative.

(7) Each violation of a provision of 40 CFR parts 72, 73, 74, 75, 76, 77, and 78 by an affected source or affected unit, or by an owner or operator or designated representative of such source or unit, shall be a separate violation of the Act.

Effect on Other Authorities

No provision of the Acid Rain Program, an Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8 shall be construed as:

(1) Except as expressly provided in title IV of the Act, exempting or excluding the owners and operators and, to the extent applicable, the designated representative of an affected source or affected unit from compliance with any other provision of the Act, including the provisions of title I of the Act relating to applicable National Ambient Air Quality Standards or State Implementation Plans;

(2) Limiting the number of allowances a unit can hold, provided, that the number of allowances held by the unit shall not affect the source's obligation to comply with any other provisions of the Act;

(3) Requiring a change of any kind in any State law regulating electric utility rates and charges, affecting any State law regarding such State regulation, or limiting such State regulation, including any prudence review requirements under such State law;

(4) Modifying the Federal Power Act or affecting the authority of the Federal Energy Regulatory Commission under the Federal Power Act; or,

(5) Interfering with or impairing any program for competitive bidding for power supply in a State in which such program is established.

Certification

I am authorized to make this submission on behalf of the owners and operators of the affected source or affected units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.

Jack R. Anderson, P.E. - Energy Resources Manager
